

## REMARKS

The present Amendment is submitted after receipt of the Notice of Allowance and is in accordance with the provisions of 37 C.F.R. 1.312. It is submitted that entry of these amendments clearly is warranted under the present circumstances for the following reasons.

The amendment to the specification is strictly of an editorial nature. Nevertheless, this amendment is necessary to ensure proper disclosure and protection of the invention. Consideration and entry of this amendment will not require any substantial amount of additional work on the part of the USPTO.

Because reference numeral 13 is used to denote the steering motor in at least seventeen other places throughout the specification, this amendment is clearly supported by the specification as originally filed and does not affect the scope of the invention disclosed or of the invention as claimed. Therefore, it will not be necessary for any additional searching or examination of the application to be conducted. The scope of the claims is not changed, and therefore the claims remain patentable for the original reasons of allowance. This amendment was not presented previously because the minor typographical error has been noticed for the first time.

As such, it is submitted that entry of the present amendment is clearly warranted, and such entry hereby is respectfully requested.

Respectfully submitted,

Satoru KOJIMA
